Healthcare Re-imagined

GE is dedicated to helping you transform healthcare delivery by leveraging critical breakthroughs in biology and technology. Our expertise in medical imaging and information technologies, medical diagnostics, patient monitoring systems, drug discovery, and biopharmaceutical manufacturing technologies is enabling healthcare professionals around the world to discover new ways to predict, diagnose and treat disease earlier. We call this model of care “Truly Health.” The goal: to help clinicians detect disease earlier, access more information and intervene earlier with more targeted treatments, so they can help their patients live their lives to the fullest.

Re-think, Re-discover, Re-invent, Re-imagine.
Volume makes the difference.

Small in size. Huge in capability.

Full-size Voluson technology – miniaturized.

Compact Volume Ultrasound from GE Healthcare is a major breakthrough in diagnostic technology. Now, the undisputed global leader in women’s healthcare introduces Voluson e, a compact solution that makes volume imaging available to an even wider range of practitioners.

Its light, portable package provides flexibility to serve your patients in any care setting. Ergonomic design makes it ready for your staff to use. Best of all, you get superior image performance that improves your diagnostic confidence. In short, just what you expect from a Voluson ultrasound unit.

From full-sized console Voluson systems, we have moved rapidly to the compact Voluson e, loaded with Volume Ultrasound tools that can bring enough to the point of care. We continue to innovate new ultrasound technologies and explore the introduction of new imaging applications that expand your diagnostic power.

Beyond excellence in imaging, we support you with world-class education programs like the International Academy of Medical Ultrasound (www.iamu.info), and a global network of Voluson users, the Voluson Club – a chance to learn from a global Voluson community.
